

VIJITH M V

Lead Software Engineer • Full-Stack Consultant

Bengaluru, India (Open to Remote) • +91 77953 36774 • vijiths2c@gmail.com
[linkedin.com/in/vijith-mv](https://www.linkedin.com/in/vijith-mv) • github.com/vijithmv499

SUMMARY

Lead Software Engineer with **12+ years** of full-stack experience and **8+ years of client-facing consulting** across fintech, capital markets, data platforms, edtech, and QSR, for clients in the US, India, Singapore, and Indonesia. Owns systems end to end — from 0-to-1 core banking platforms sustaining 18K RPM to trading back-office systems, cloud infrastructure, and large-scale data pipelines. Practitioner of TDD and pair programming; experienced in leading Agile teams, mentoring engineers, and delivering remotely with distributed teams.

CORE SKILLS

Languages: Python, Go, Ruby, Java, C#, Clojure, JavaScript, CoffeeScript

Backend: Ruby on Rails, Spring Boot, Spring Security, ASP.NET, Frappe, REST APIs, Microservices

Frontend: ReactJS, AngularJS, Backbone.js

Data & Messaging: Apache Kafka, NATS, AWS SQS/SNS, Dagster, DBT, Scrappy, Snowflake, Elasticsearch, Debezium (CDC)

Databases: PostgreSQL, MySQL, Microsoft SQL Server, Redis, DynamoDB, MariaDB

Cloud & Infrastructure: AWS (ECS, EKS, Lambda, S3), Kubernetes, Helm, Docker, Terraform, Argo Workflows

CI/CD: GitHub Actions, GitLab CI, CircleCI, Bitbucket Pipelines, GoCD

Observability: OpenTelemetry, Prometheus, Grafana, Loki, Tempo, Fluent Bit, Datadog, New Relic, Sentry, ELK, PagerDuty, OpsGenie

Practices: TDD, Pair Programming, Agile/Scrum, Code Reviews, Mentoring, Legacy Modernization

PROFESSIONAL EXPERIENCE

Beskar Technologies LLP — Lead Consultant | Bengaluru (Remote) Jun 2021 – Present

Hands-on consultant delivering end-to-end solutions — architecture, development, infrastructure, and observability — for fintech, data, and QSR clients, while practicing TDD and mentoring client teams.

Trading Platform — Back-office & Infrastructure Modernization • Capital Markets 2025 – Present

- Built the back-office application powering business-critical **Beginning-of-Day (BOD)** and **End-of-Day (EOD)** operational workflows for a trading platform, using Frappe (Python) as the core UI and application framework
- Designed a reusable workflow framework extensible to multiple operational and business-critical use cases
- Built a **high-performance Go service** that ingests live market tick data from external providers and publishes it to NATS streams for real-time internal processing
- Built comprehensive audit frameworks covering API activity and database-level changes for compliance, traceability, and operational visibility
- Owned the **complete AWS infrastructure** — Terraform-provisioned ECS environments and CI/CD via Bitbucket Pipelines
- Implemented platform-wide observability: OpenTelemetry instrumentation, Prometheus + Grafana metrics, centralized logging (CloudWatch → Fluent Bit → Loki), and distributed tracing with Tempo
- Integrated third-party services to automate document retrieval and Business-As-Usual (BAU) operations

Tech: Python, Go, Frappe, PostgreSQL, Redis, NATS, AWS ECS, Terraform, OpenTelemetry, Grafana, Prometheus, Loki, Tempo, Fluent Bit, Bitbucket Pipelines

HData — US Regulatory Data Platform • Data Analytics, US Aug 2024 – 2025

- Built large-scale pipelines scraping and processing public-utility and regulatory data from US state commission websites into Elasticsearch, Snowflake, and AWS S3
- **Cut pipeline runtimes by 50%+** through multi-threaded processing and Scrappy configuration tuning
- Orchestrated ingestion, scheduling, and monitoring with Dagster; built AWS Lambda pipelines moving data from Snowflake into DBT transformation workflows and Elasticsearch indexing
- Developed serverless workflows extracting text from multiple document formats for downstream search and analytics

Tech: Python, Scrappy, Dagster, Snowflake, DBT, Elasticsearch, AWS Lambda / S3 / SQS / EKS, GitLab CI

Jack in the Box — Restaurant Store Management System • QSR, US Aug 2023 – Apr 2024

- **Led migration off a 20-year-old legacy system** to a modern store-management platform; built pipelines syncing both historical data and live changes into the new application

- Upgraded the backend to absorb requirements from the Del Taco acquisition and built new functionality supporting teams still operating on the legacy system
 - Built capabilities to publish live data updates (and on-demand history) to downstream consumers
- Tech: ASP.NET, ReactJS, Python, Microsoft SQL Server, Kubernetes, Helm, Terraform, DynamoDB, AWS SQS/SNS, CircleCI, Datadog, OpsGenie*

Scripbox — Mutual Fund & Financial Services Platform · Fintech, India Jun 2021 – Aug 2023

- Sole owner of the payments module on the core monolith; **led migration of payment processing and mandate registration to the industry-leading vendor**, eliminating file-based processing and cutting operational costs by **₹3M (≈ \$36K) per year**
 - Implemented SEBI regulatory changes, including MIS reporting, in collaboration with payment providers; key member of the order-management migration from the RTA channel to NSE
 - **Optimized performance to handle 5x existing traffic**; tuned long-running daily jobs, moved third-party callbacks to a serverless processor backed by message queues, and introduced performance-monitoring dashboards
 - Trained and onboarded new team members; supported operations teams in resolving BAU issues
- Tech: Ruby on Rails, MySQL, Redis, Kubernetes, Apache Kafka, AWS SQS, GitLab CI, ReactJS, Sentry, Graylog*

Navi Technologies Pvt Ltd — Lead Software Engineer | Bengaluru Dec 2019 – Apr 2021

- Part of the **0-to-1 team** that built a proprietary core banking platform from scratch on a distributed, resilient stack — **MVP launched to market within 3 months**
 - Owned core domain services (accounting, customer-read, master data, product information, collections, customer support) sustaining **~18K RPM**, plus platform services: Kafka monitoring at **~4,000 messages/sec**, auth/security at **~8K RPM**, batch processing, and schedulers
 - Built automated dynamic customer notifications and a voice bot for collections follow-ups — **processing 100K loans in 5 minutes** and reducing recovery expenses
 - Built an audit-trail framework for backend applications with a Debezium CDC + Kafka pipeline streaming audit data to the cloud; automated customer-support responses via Freshdesk
- Tech: Spring Boot, Spring Security, PostgreSQL, Apache Kafka, Redis, ZooKeeper, Debezium, ReactJS, GoCD*

Mavenhive Technologies Pvt Ltd — Senior Associate (Consultant) | Bengaluru Jul 2016 – Dec 2019

Circles.Life — Virtual Mobile Network Operator · Telecom, Singapore Apr 2019 – Dec 2019

- **Led backend API development for a forex card product** from inception to internal launch; integrated advanced monitoring into core products
- Tech: Go, MySQL, Redis, ReactJS, New Relic, Kibana*

Go-Jek — Leading Super App · Indonesia Jul 2017 – Apr 2019

- Built driver document-verification workflows and extracted the driver-installments microservice from the monolithic driver-management application
 - Automated customer ticket resolution during the Zendesk → Salesforce migration and built a low-rating automation framework from scratch
 - **Key member scaling ops-tech applications to 3 new countries** beyond Indonesia
- Tech: Ruby on Rails, Go, Clojure, PostgreSQL, Redis, Apache Kafka, Sentry, New Relic, Kibana, Grafana*

Zinc Learning Labs — Vocabulary Learning Platform · EdTech, US Jul 2016 – Jun 2017

- Built games and quizzes improving English and French vocabulary for middle- and high-school students; key contributor to the AngularJS → ReactJS front-end migration
- Tech: Ruby on Rails, PostgreSQL, Redis, AngularJS, ReactJS, New Relic, Sentry*

Foradian Technologies Pvt Ltd — Software Engineer | Bengaluru Sep 2013 – Jun 2016

- Built **Uzity**, a full-stack online Learning Management System, from the ground up
 - Co-built **fluxday (fluxday.io)**, an open-source OKR-based productivity and task-management tool for small organizations
- Tech: Ruby on Rails, Backbone.js, MariaDB, MySQL, CoffeeScript, jQuery*

EDUCATION

Bachelor of Technology (B.Tech), Computer Science · LBS College of Engineering, Kasaragod, India
Graduated with 78% aggregate

Aug 2009 – Jun 2013
